**NiC.BAND® PROGRAM**

This is a cranial comparison, side view of the head, showing the amount of rounding of the back of the head. The green line represents the initial scan and the red line represents the exit or end of treatment scan. The white space between the lines is the amount of movement of the skull bones. The comparison can be done at any level, from the top of the head to the chin.

Side Comparison

This is a cranial comparison, viewed from the top of the head, showing the amount of rounding of the side of the head. The green line represents the initial scan and the red line represents the exit or end of treatment scan. The white space between the lines is the amount of movement of the skull bones. The comparison can be done at any level, from the top of the head to the chin.

Top Comparison
